MAIN BEARING UPGRADES

MALLOY

Upgraded Main Bearing Features

- Roller guided cage eliminates unnecessary sliding surfaces
- Improved carbide distribution maximizes bearing life in non-ideal lubrication
- Advanced raceway surface finish applies on the inner ring, outer ring, cage & rollers
- Optional DLC rollers on select platforms
- Super-TF material reccommended for the toughest platforms

Benefits Of Super-TF

- Optimal performance in low lambda environments
- Debris & wear resistance improves bearing life in contaminated lubrication
- Resistance to white structure propagation
- Additional resistance to surface originated spalling
